<b>SECTION 4 - PROJECT DESCRIPTION (Env-Wq 1406.17)</b>			
Provide a brief description of the proposed project including square footage of impacts and dimensions of new structures.			
The project will replace the existing toll plazas on Route 16 in Dover and Rochester with all electronic tolling. There are 52,050 SF of impacts within the 250 foot protected shoreland buffer of the Bellamy River in Dover to realign/widen the roadway and construct side slopes. A net decrease of 1,595 SF of impervious area within the shoreland zone will result from shoulder pavement removal.			
TOTAL SQUARE FEET OF IMPACT: 52,050 TOTAL SQUARE FEET OF NET CHANGE IN IMPERVIOUS AREA: -1,595			
Total impact area is determined by the sum of all areas disturbed by excavation, fill, and construction. Examples include, but are not limited to: constructing new driveways, constructing new structures, removing or replacing structure foundations, grading, and installing a new septic system or well.

<input checked="" type="checkbox"/> YES	<b>Required for all projects:</b> A clear and detailed plan of work depicting, at a minimum, all impact areas, the <u>reference line</u> , and property lines. Plans that are not to scale must show all relevant dimensions and distances from the reference line and dimensions.
<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	This project proposes an increase in <u>impervious</u> (i.e. non-permeable) area. Plans must include the dimensions and locations of all existing and proposed <u>impervious surfaces</u> on the lot that are within 250 feet of the <u>reference line</u> . Decks are typically considered impervious.
<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	< 20% This project proposes an increase in <u>impervious area</u> , and the total post-construction impervious area on the lot within 250 feet of the <u>reference line</u> will not exceed 20%.
<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	20 – 30% This project proposes an increase in impervious area such that the total <u>impervious area</u> of the lot within 250 feet of the reference line will be greater than 20% but less than 30%. Plans must include a <u>stormwater management system</u> that will infiltrate increased stormwater runoff from development per RSA 483-B:9, V(g)(2) and in accordance with <u>Env-Wq 1500</u> .
<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	> 30% This project proposes an increase in <u>impervious area</u> such that the total impervious area on the lot within 250 feet of the <u>reference line</u> will be greater than 30%. Plans must include a <u>stormwater management system</u> designed and certified by a professional engineer to account for all new development, and plans must demonstrate how the vegetation point score is met per RSA 483-B:9, V(g)(1,3).
<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	This project proposes impacts within 50 feet of the <u>reference line</u> . Plans and photos must show each area of the <u>waterfront buffer</u> that will be impacted, including groundcover, and calculate the tree and sapling point scores in accordance with the <u>Vegetation Management Fact Sheet</u> .
<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	This project proposes impacts between 50 and 150 feet of the <u>reference line</u> . Plans must depict the 25% area of the woodland buffer to be designated and maintained as natural woodland. See the <u>Vegetation Management Fact Sheet</u> .

<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	<p>This project proposes to install or expand an <u>accessory structure</u>, such as a patio or shed, within 50 feet of the <u>reference line</u>.
