PROJECT: WETLAND PLANS CHECK LIST		in Volume 2 of the Highway Design Manual)
SHEET	DONE CHECKE BY/DATE BY/DAT	
 1. FRONT SHEET A. Location map Project location designated with a circle State Project Number attached to circle North arrow 		
 North arrow Major roads labeled Town, city, county & state names labeled and boundaries shown Rivers, brooks, streams, lakes, etc. labeled Railroads (RR) labeled Graphic Scale 		
 B. <u>Layout</u> Existing buildings (solid), roadway edge of pavement (E.P.) drive E.P.'s curbing, bridges, railroads, rivers, streams, brooks, and lakes shown. Existing rivers, streams, brooks, lakes, roads, Railroad crossing, town/ci county & state boundaries labeled, and "To (Town or City)" at all ends of project with destination arrows. Show watercourse flow arrow. North arrow Town/city of () 	ty,	
 County of () Scale Begin and End Construction with Station Limit of Work with Station Construction Alignment with stationing labeled every 500 feet Delineated wetlands shown (if visible with scale used). Designated wetland impact areas with dash box and sheet number noted

WETLAND PLANS CHECK LIST (Refe	Rev. D	ate: 11/30/2012	nme 2 of the Highway Design Manual)
SHEET	DONE BY/DATE	CHECKED BY/DATE	REMARKS
C. Miscellaneous			
□ Project name & (Federal and State) numbers			
□ Road name in sheet title			
□ "Drafted by" and "Sheet checked by"			
□ Sheet numbers and project numbers			
□ Sheet Titled Wetland Plans			
□ Note "For Construction and Alignment Details - See the Construction Plans"			
2. SYMBOL SHEET			
□ Latest revision date verified			
3. <u>EROSION CONTROL LEGEND & STRATEGY SHEETS</u>			
□ Latest revision date verified			
4. <u>WETLAND PLAN SHEETS</u>			
A. General			
 Existing detail including delineated wetlands and 100-year floodplain (excluding miscellaneous text such as curb types, sidewalk types, etc. and tree and utility annotations) 			
 Alignment(s) labeled (construction and diversion). Omit curve data, PC's, PT and PI's. 	"'s		
□ North arrow			
□ Parcel number and owner's name			
 ROW lines and property lines 			
 Proposed ROW: label ROW, LAROW or CAROW on all cut sheets 			
• Existing ROW: label "Approximate Existing ROW" appropriately on all			

PROJECT:	PAGE: 3 of 5 Form No.	APPENDIX 2-14
WETLAND PLANS CHECK LIST	Rev. Date: 11	/30/2012 Plans in Volume 2 of the Highway Design Manual)
SHEET		CKED REMARKS DATE
cut sheets		
 B. Proposed Detail: T.W.'s, E.P.'s, curbing, sidewalks, retaining walls and guardrail Slope lines and clearing lines Wetland impacts Contours (2 foot interval) Fence, pedestrian rail, and bike rail Easements shown and labeled (do not shade or hatch) Drainage Closed drainage system with flow arrows and outlet pipe sizes Culverts, labeled with flow arrows and pipe sizes Stone protection locations 		
 C. Wetland Information Wetland classification code chart (only on first Wetland Impact plan she Wetland impact summary – dual dimension for metric projects, (only or Wetland Impact plan sheet) Delineated wetlands with designated number and classification TOB, OHW, TBZ and TOBOHW line designations shown Wetland impact location letter(s) shown 		
 D. Notes No ROW notes (alignment radius, flagging etc.) No construction notes (drainage, guardrail, driveway etc.) Road names (on each cut sheet) Graphic Scale

WETLAND PLANS CHECK LIST		rate: 11/30/2012 Impact Plans in Volun	ne 2 of the Highway Design Manual)
SHEET	DONE BY/DATE	CHECKED BY/DATE	REMARKS
Erosion Control Strategies developed by the Department			
 C. Notes No ROW notes (alignment radius, flagging, etc.) No construction notes (drainage, guardrail, driveway, etc.) Road names (on each cut sheet) Graphic scale (50-scale unless otherwise noted) 			
6. <u>ADDITIONAL REQUIREMENTS</u>			
 Crowded wetland impact areas may require an enlarged area to be included the plans. Verify with the BOE Environmental Coordinator Provide a plan narrative detailing the erosion control strategies to be used during Traffic control phasing. Staple, stamp in red and date all outgoing Wetland plan prints with the pronumber and "PRELIMINARY PLANS SUBJECT TO CHANGE". Plans to be stapled and stamped on the front sheet and on each end of the roll. Submit Draft Wetland package to Hydraulics Section of Design Services the forward to the BOE Environmental Coordinator and Wetland Permit Coordinator for review. Include preliminary Slope Stabilization detail on the Erosion Control Plans 	ject will nen		
 Place Wetland plans in the "tub" separate from ROW and Construction Pla File in pigeon hole all office copies of Wetland Plan submission together in one roll with the latest revision on top when unrolled.
