Keene 10309B, STP-0111(007) ..... 1

**Keene 10309B, STP-0111(007)**

Participants: Jennifer Zorn, Gene McCarthy, MJ; Ron Crickard, NHDOT

Initial consultation to discuss the Winchester Street reconstruction project effects with the intention of determining effect in preparation for the compilation of the effect memo for inclusion in the NEPA document.

The proposed project consists of constructing two hybrid roundabouts at the Key Road and Island/Pearl Street intersections along Winchester Street; associated roadway widening; and replacing the bridge carrying Island Street over the Ashuelot River, in Keene, New Hampshire. Winchester Street is a north-south collector roadway, designated as a minor arterial, and spans from the Swanzey town line north to Main Street in downtown Keene.

Laura Black explained that in her review of the materials for the meeting she noticed the Request for Project Review form used the old NH DHR Inventory numbers. The numbers provided in the RPR were incorrect. L. Black provided the correct numbers for future use. L. Black also requested that three previous forms be updated for this current project review. She detailed that conditions present in 1997 may be changed and the previously completed forms may contain outdated information. The request was made based upon the Architectural Survey Policy, also referred to as the 10-year policy guidance. The sites/forms needing updates include: Hickey-Desilet Park (KEE 0532); 185-193 Island Street (KEE 0534); and Island Street/Pearl Street Historic Area.

Regarding the Daniel Goodnow House, L. Black requested that the Impact Table be updated with more detail on the proposed work near the structure and suggested that rather than saying that setting and context are not contributing aspects of the property's significance, it could be said that the area surrounding the Daniel Goodnow House has already been altered and developed over time with modern commercial structures and a large parking lot.
