Subject: 2023 – 2026 STIP Amendment #5

Attn: Leigh Levine, FHWA and Christina Mendoza, FTA

The New Hampshire Department of Transportation is submitting for your approval Amendment #5 to the 2023-2026 Statewide Transportation Improvement Program (STIP). Consistent with the requirements of 23 CFR 450.216, the 2023 – 2026 NH STIP Amendment #5 has been developed in coordination with the required metropolitan and statewide planning processes. Also as required, the Amendment has incorporated projects from each of the Transportation Improvement Programs (TIP) developed by the four MPOs. All projects designated as regionally significant by the MPOs and through Interagency Consultation (IAC), regardless of the funding source are included in the STIP Amendment. All surface transportation projects that utilize resources from programs funded under Title 23 USC and Title 49 USC part 53, except for the programs identified in 23 CFR 450.216(g), are included in the STIP Amendment.

The Amendment has been constrained to the available financial resources for Federal Fiscal Year (FFY) 2024 and the resources that are reasonable anticipated being available through FFY 2026. To depict the financial status of the Update more accurately, an inflation rate of 3.7% is included for projects, satisfying the year of expenditure requirement in 23 CFR 450.216(l).

The MPO TIPs were developed in accordance with federal regulations through a coordinated planning effort and each has completed a self-certification resolution as part of the recent STIP Update. The MPOs, through consultation with the NH Department of Transportation, NH Department of Environmental Services, U.S. Environmental Protection Agency, Federal Highway Administration, and Federal Transit Administration have determined that the cumulative analysis of all four MPO TIPs is below limits outlined in the motor vehicle emissions budgets for ozone and thus conform to the National Ambient Air Quality Standards (NAAQS). The two MPOs with Carbon Monoxide maintenance areas have also demonstrated conformity.

In accordance with the NH STIP Revision Procedures and the MPO TIP Revision Procedures, a series of minor revisions to the NH 2023-2026 STIP have been approved during the development of the Amendment. Through an agreement with FHWA, the MPOs, and other Interagency Consultation Partners, those minor revisions will be incorporated into the 2023 – 2026 STIP Amendment #5.

Letter to FHWA & FTA 2023-2026 STIP Amendment #5 Mary 7, 2024 Page 2 of 2

During the processing of the STIP Amendment #4 the NHDOT held a public comment period of 10 days as determined through the Interagency Consultation and received 1 public comment:

Hudson 42108: NRPC had heard of some concern expressed at this project being proposed for inclusion in the STIP as part of A5. AT the Town Elections in March a majority of the voters in the Town had voted not to raise the required local for this project. As a result, NRPC and NHDOT agreed to remove this project from A5.

NHDOT's public comment period was held from April 19th to April 30th.

The 2023-2026 NHDOT STIP document is posted on the NHDOT, please see the link below for more information.

Appendix A: NH Highway System Tiers

Appendix B: State Biennial Performance Report

Introduction

The requirements as codified in Title 23 Part 135 and 49 Part 5305 of the United States Code (USC), stipulate that each state will develop a continuing, cooperative, and comprehensive statewide multimodal transportation planning process, including the development of a Statewide Transportation Improvement Program (STIP). In New Hampshire the STIP is updated every two years and is developed through a coordinated statewide and metropolitan planning process.

The metropolitan planning process, as defined in 23 USC Parts 134 and 49 USC Parts 5303, is carried out by the four Metropolitan Planning Organizations (MPOs) in New Hampshire: Nashua Regional Planning Commission (NRPC), Rockingham Planning Commission (RPC), Southern NH Planning Commission (SNHPC), and Strafford Regional Planning Commission (SRPC). Each of the MPOs has adopted a Metropolitan Transportation Plan (MTP) and a Transportation Improvement Program (TIP), and with each TIP amendment the MPOs amend their MTP for consistency. The MTPs were developed and approved in accordance with 23 Part 450.322 of the Code of Federal Regulations (CFR) and include a financially constrained program of transportation projects within their regions. The MPO TIPs are consistent with the regulations outlined in 23 CFR §450.324, including requirements related to financial constraint, and have been incorporated into the 2023-2026 NH STIP.

Following the 2010 Census the Nashua Regional Planning Commission was also designated as a Transportation Management Area (TMA). New Hampshire Department of Transportation (NHDOT) and the three MPOs included in the Nashua Transportation Management Area (TMA) and Boston Urbanized Area (UZA) developed agreements and policies to ensure compliance with the federal requirements for planning and programming of projects. The three MPOs included in this collaboration include NRPC, SNHPC, and RPC.

Under the Clean Air Act section 176(c) (42 U.S.C. 7506 (c) transportation conformity is required to ensure that federal funding and approval are given to highway and transit projects that conform to the air quality goals established by Environmental Protection Agency (EPA) in the State Implementation Plan (SIP).

In July 2013, all of New Hampshire became unclassifiable/attainment for the 2008 8-Hour Ozone National Ambient Air Quality Standard (NAAQS). As of March 6, 2015, the Environmental Protection Agency (EPA) published a final rule (80 CFR 12264) which included the act of revoking the 1997 Ozone NAAQS (for transportation only) resulting in the elimination of nonattainment/maintenance status for that standard. This ruling re-designated the Boston-Manchester-Portsmouth, NH area to "attainment" status. On April 6, 2015, the 1997 8-Hour Ozone was revoked for all purposes, including transportation conformity, thus alleviating the Boston-Manchester-Portsmouth (SE) NH area from having to demonstrate the conformity of transportations plans. However, due to a decision of the U. S. Court of Appeals for the District of Columbia Circuit (South Coast Air Quality Management District v. EPA), as of February 16, 2019, transportation conformity for the 1997 ozone NAAQS again applies in the Boston-Manchester-Portsmouth (SE) NH "Orphan Area." On October 16, 2015, the EPA issued a final rule reducing the NAAQS standards for ozone.

Therefore, some areas of NH are still required to demonstrate conformity for the 1997 ozone NAAQS for any plans approved after February 16, 2019. The cities of Nashua and Manchester were classified maintenance areas for carbon monoxide. Any applicable findings of conformity to the NH State Implementation Plan of all MPO TIPs and MTPs have been made and documented through a process consistent with the requirements of 23 CFR Part 450 and 40 CFR Part 93.

Every two years the State of NH prepares and adopts a Ten-Year Transportation Improvement Plan (TYP). The most recent TYP was approved on June 30, 2022, and includes a list of projects for the period from 2023-2032. Every Ten-Year Plan is developed to be consistent with the framework established in the NH Long Range Transportation Plan (LRTP) 2010-2030. The LRTP outlines a broad strategic direction for the State and for the Department of Transportation for a 20-year period. The LRTP was developed in accordance with the requirements of 23 USC, Part

134 and is a federally approved plan. Currently NHDOT is soliciting for consultant assistance for the update to the NH Long Range Transportation Plan.

Building upon the LRTP, the Ten-Year Plan process further defines and identifies specific transportation projects which will be funded with various funding sources. The process to develop the Ten-Year Plan involves substantial input from the public, elected officials, transit operators, state agencies, regional planning commissions, and MPOs. Critical to the TIP and the TYP process is the acknowledgement and documentation to show that planned transportation projects are constrained to fit within reasonably anticipated revenues to fund the proposed projects. Planning fiscal constraint is required, and further demonstrates the importance of addressing national and state priorities, performance measures, and meeting all applicable federal requirements. In the 2023-2032 Ten-Year Plan several programs were increased by 20% in anticipation of an increase in federal funds through the Bipartisan Infrastructure Law (BIL).

The 2023-2026 NH STIP has been developed through a coordinated statewide and metropolitan planning process that is consistent with the requirements of 23 CFR §450.218. All projects designated as regionally significant by the MPOs and through Interagency Consultation (IAC), regardless of the funding source, are included in the STIP. All surface transportation projects that utilize resources from programs funded under Title 23 USC and Title 49 USC Part 53, with the exception of the programs identified in 23 CFR §450.216(g), are included in the STIP. The STIP has been constrained to the available financial resources for 2023 and the resources that are reasonably anticipated to be available through 2026. To depict the financial status of the STIP more accurately, inflation at a rate of 3.70% is included for projects, satisfying the year of expenditure requirement in 23 CFR §450.218(I).

In accordance with the NH STIP Revision and the MPO TIP Revision Procedures, a series of minor revisions to the NH 2023-2026 STIP and MPO's TIPs have been approved during the development of the STIP Update. Through those Revision Procedures that were agreed upon by Federal Highway Administration (FHWA) NH Division, Federal Transit Administration (FTA), the MPOs, and other Interagency Consultation Partners, those minor revisions will be incorporated into the approved 2023-2026 STIP Update.

Financial Plan

The Bipartisan Infrastructure Law (BIL) was signed into law on November 15, 2021. The BIL will set the annual apportionment and limitation on obligations for Federal Aid Highway Funding for FYs 2022 through 2026. The STIP Financial Plan has been prepared to satisfy the requirements of 23 CFR §450.218. Pursuant to these federal regulations, the STIP shall include projects, or identified phases of projects, only if full funding can reasonably be anticipated to be available for the project within the time period contemplated for completion of the project.

In the 2023-2026 STIP Amendment #5 the Financial Constraint Report federal apportionment for 2023 are figures from the Status of Funds report(W10A) published by FHWA on 2/15/2024. Federal fiscal years 2024 -2026 are federal revenue projections based on the 2023 apportionment and the BIL.

The financial plan outlines funding sources and other relevant information about the specific projects or programs. The STIP Financial Plan serves to convey relevant information about the projects, so that the public process is transparent and provides the public an opportunity to understand the financial resources required for the projects identified for funding.

As NHDOT strives to meet the financial challenges of the State's transportation system, all potential revenue sources will continue to be evaluated. Various sources of funding to be utilized may include federal dollars, match amounts, state resources from the Highway Trust Fund and those provided in the budget of the State of NH, turnpike revenue, and local and private revenue sources.

The NHDOT STIP Financial Constraint process is based on the guiding principles:

- All Federal funds obligated will be appropriately matched and the matching funds are indicated in the constraint analysis and at the project level.
- Stand-alone projects with funding authorization under a Program (grouped projects) are made available to MPOs for inclusion in their TIP. Grouped projects have similar function, work type, or area; and are selected using competitive selection, inspection, or data decision process.
- Matching funds provided by municipalities and other sources will be committed by those entities before any work may begin on the project.
- Advance Construction (AC) may be used at the State's discretion in accordance with Title 23, Section 115.
- Turnpike Toll Credits may be used to provide the non-federal match of a project if those credits are available. State match budgeted for FY 2023-2026 (as discussed and agreed to by NHDOT and FHWA) is primarily in the form of Turnpike Toll Credits.
- Newington, Dover, Manchester, and Berlin have received Rebuilding American Infrastructure with Sustainability and Equity (RAISE) grants and are shown in the STIP Financial Constraint Report.
- Enfield has received National Scenic Byways Program funding and is shown in the Financial Constraint report.
- To estimate year of expenditure dollars for future years in the STIP, an annual inflation rate of 3.70% is applied to each year following the second year of current estimate. The NHDOT developed an annual estimated rate of inflation of 3.70% with the concurrence of the FHWA Division Office. That rate is a rolling rate based on historical trends over a 10-year period.
- For projects planned as advance construction, the entire construction cost is inflated in the year of advertising and not compounded in each year of anticipated conversion.
- All projects funded in the STIP are included in the analysis of STIP financial constraint.
- In the first amendment of each federal fiscal year the NHDOT will show that year as financially constraint by specific funding source.
- The NHDOT is showing future years as constrained in the Financial Constraint Report by total of all funding sources and is continuing toward a goal of having individual funding categories constrained in all years of the STIP.
- By funding category, apportionment balances from previous years, as well as the transfer flexibility inherent within the BIL, will be utilized as necessary.

To accurately show reasonable funding availability, the NHDOT plans to constrain funding sources in STIP years:

- Funds needed for apparent overprogramming of apportioned funds have historically come from available funding transferred from other programs such as Congestion Mitigation and Air Quality Program (CMAQ) and National Highway Performance (NHP). NH has also historically relied upon deobligations, and end-ofyear redistributed funds to address this situation as well.
- In situations like the apparent overprogramming in 2026 of National Highway Freight funds, NHDOT will use available (unobligated) funds from prior years.

Federal Resources

There are four main federal funding sources of revenues. These include federal formula, federal non-formula, allocated, and Congressional Directed Spending. Each is briefly described below.

Federal Formula

Most federal resources are distributed to the states through annual apportionments outlined in the most current federal transportation bill, which currently is the BIL. In addition to the apportionment, the federal government establishes on an annual basis and in accordance with Public Law 117-58, a "limit on obligations" that functions as a ceiling on the amount of funds that may be requested in a fiscal year. Figure 1 outlines the trend over recent years for both apportionments and limitation on obligations for NH in the core apportioned programs.

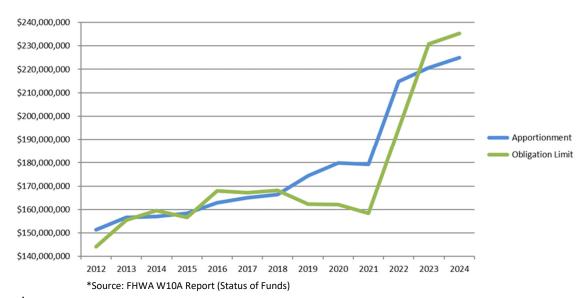

Figure 1 – Apportionment & Obligation Limit

Federal Non-Formula

Federal Non-Formula funds include apportioned-exempt funds and apportioned funds subject to special limitations. These funds are detailed in the W10A reports. Please note that for the 2023-2026 STIP NHDOT has taken the approach of allocating 2024 apportioned non-formula funds to align with current programming of planned projects. This was done in part due to the lack of detailed financial information at the time the STIP Update was developed.

Allocated Funds

Allocated Funds are not distributed to the state automatically, they need to be requested or transferred. Examples of allocated funds that are requested directly from FHWA and then allocated are: Disadvantage Business Enterprise (DBE), State Transportation Innovation Council (STIC), National Summer Transportation Institute (NSTI), and On the Job Training (OJT). Another type of allocated funds is for the Local Technical Assistance Program (LTAP) which gets allocated after specific criteria has been met.

Congressional Directed Spending (CDS)

Another source of revenue for projects from the federal government is made available through Congressionally Directed Spending (CDS). CDS funds are special limitations that normal apportionments aren't subject to and may be moved between fiscal years based on availability and project schedule without adherence to the limitation on obligations. CDS funds were formerly known as earmarks. In fiscal year 2022, NHDOT, working with FHWA, reviewed Earmarks for repurposing. Earmarks signed into law prior to September 30, 2005, with no funds expended or the project was complete would be eligible for repurposing to another project within 50 miles of the Earmark

project if the Earmark funds were not replacing obligated funds. As such, the 2023-2026 STIP was developed with the assumption that earmark funds that have already been designated or repurposed will be available for the identified project when the project is ready to move forward. Federal guidance also specifies that future earmarks that have not yet been approved by Congress may not be assumed as revenue in a STIP. Consistent with that guidance, the NH STIP includes only approved and designated earmark funds. In the STIP Financial Constraint Report earmarks funding revenue is shown in the Status of Funds apportioned and the exempt allocated direct congressional funding. Earmark funding varies in STIP years because of project schedule and advertising dates.

State Resources

The state budget process and legislative process is important to the development of the NHDOT Ten Year Plan, and the planning of transportation improvement projects.

The State budgeting process is outlined in the NH Revised Statues Annotated (RSA). The state budgeting process outlines submittal dates for submitting budgets. A brief explanation of the deadlines of the state budgeting process is discussed below.

RSA 9:4 states that every state agency submits to the Commissioner of Administrative Services two budgets biennially for consideration: 1) an operating budget and 2) a reduction level expenditure estimate. For STIP planning purposes, the Fiscal Years 2023-2026 budget contains the best information NHDOT has available regarding anticipated state revenue, as well as total expenditures that are planned as part of the budget. If there are changes in the budgeted amounts within NHDOT's budget for Federal-aid projects, then it will be appropriate for the STIP Financial Constraint to be updated, adjusting project schedules to meet the projected resources. Any project changes in the STIP would require appropriate amendments, including coordination with MPO's, FHWA, FTA, EPA and other agencies as required.

Senate Bill (SB) 367

The NH Legislative process affords opportunities to introduce proposed language for new laws regarding a variety of subjects, including funding. In 2014, New Hampshire Senate Bill (SB) 367 was signed into law. As a result of this legislative action the gas tax in New Hampshire was increased. SB 367 increased the gas tax and allowed for the issuance and payment of general obligation bonds (currently a repayment of a TIFIA direct loan) to widen I-93, and to provide additional funding for the district rehabilitation program, the district resurfacing program; the state bridge aid program; and the highway and bridge betterment program. The estimated revenue from SB 367 is shown below.

Senate Bill (SB) 367
Source Agency Budget Submission 2023-2026*

2023	2024	2025	2026
Total Resources	Total Resources	Total Resources	Total Resources
Available	Available	Available	Estimated
\$34,477,878	\$34,096,152	\$34,266,632	\$34,266,632**

^{*}Source: https://www.gencourt.state.nh.us/lba/

The NH budgeting process has three important transmittal dates. Each is briefly discussed below. On or before October 1st of all even years (October 2022 for the purpose of this STIP), an operating budget must be developed that shows maintenance expenditures necessary for the agency. Maintenance expenditures are defined as "the cost of providing the same level of service authorized and funded in the preceding fiscal year, incorporating changes in the population, economic conditions, and other factors outside the control of the accounting unit."

^{**}Revenue estimate is expected to change

On or before November 15th prior to each biennial legislative session, all departments of the state shall transmit to the commissioner of administrative services, a reduction level expenditure estimate for each fiscal year of the ensuing biennium for administration, operation, and program services, including costs for workers' compensation and unemployment compensation.

By June 30th of the following odd numbered year, the Governor and Legislature make the final recommendations and approvals of the agency budgets, based on their reviews, and the normal legislative process. Agency budgets are to be built from the bottom-up using a zero-based budgeting approach. With this zero-based budgeting approach, it is ensured agencies review all program areas. This should aid in prioritization, determining the effectiveness of programs, and identifying areas where efficiencies can be achieved.

Turnpike Toll Credits

Federal regulations (23 USC §120) allow a State to use toll credits toward the non-Federal match requirement of a project, provided that the project is listed in the STIP. These credits are based on toll revenues that are generated and used by public, quasi-public, and private agencies to build, improve, or maintain highways, bridges, or tunnels that serve the public purpose of interstate commerce. Such public, quasi- public, or private agencies shall have built, improved, or maintained such facilities without Federal funds.

To receive these toll credits, a State shall show that it has maintained the federal-aid eligible portion of the transportation system with non-Federal transportation capital expenditures in accordance with the given requirements. NHDOT has shown that it has met these requirements in the past and has utilized toll credits to match federal funds. Consistent with existing practices, the 2023-2026 STIP identifies the use of toll credits by project and accounts for the use as part of the financial constraint information.

At the end of federal fiscal year 2023 NH had a balance of toll credits in the amount of \$186M; this amount exceeds the 20% match required of the State. The total amount of toll credits programmed for the four years of the STIP is \$159.6M. Identified at the project level in the STIP, NHDOT may coordinate with FHWA to use toll credits on a case-by-case basis in any of the STIP years. The use of this matching mechanism will be documented in the STIP as Amendments are published.

Federal Toll Credits

2023	2024	2025	2026

\$52,715,797	\$48,230,946	\$62,884,699	\$33,465,774				

Source: NHDOT ProMIS

Advance Construction (AC)

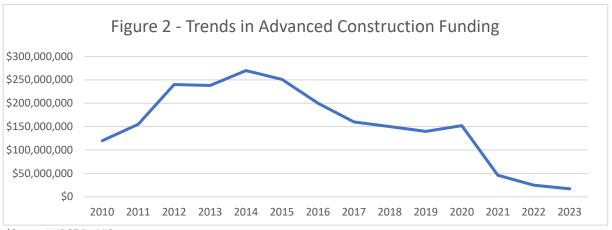

Advance Construction is a funding management tool which allows for accelerated project work time. NHDOT can incur costs on a project if it has been Advanced Constructed and submit the funds later to be federally reimbursed. The STIP must remain financially constrained if there are any modifications to the anticipated AC conversion schedules of projects.

The NHDOT has assumed a conservative approach for AC with a standing goal to ensure that conversions to Federal aid remain ahead of actual project expenditures. If Federal funding fail to become available, NHDOT would have to use non-Federal funds or suspend work on the project, which is why NHDOT has reduced Advance Construction totals in recent years. Figure 2 below shows NHDOT trends in using the AC management tool.

Beginning in 2009 the NHDOT revised the process of AC to include preliminary engineering and right of way. All active projects were updated with the appropriate AC amount for all phases resulting in an increased AC balance.

Under the provisions of 23 USC Part 115(a) and as further outlined in 23 CFR §630, the State may utilize Advance Construction (AC) on Federal-aid projects with the approval of FHWA. Guidance from the FHWA Resource Center

has indicated that the cumulative amount of AC should remain below 1½ times the annual apportionment of federal funds for FHWA programs. Advance construction is subject to approval from FHWA and will be tracked as normal Federal-aid projects are in the federal Financial Management Information System.

*Source: NHDOT ProMIS

Turnpike Authority

On the turnpike system most capacity related improvements or system expansions qualify as regionally significant as defined in federal regulations. Pursuant to 23 CFR §450.218(h) a STIP must contain all regionally significant projects regardless of funding source. The determination of regional significance is made at the MPO level, or by the DOT in rural areas, with input through Interagency Consultation. As the 2023-2026 STIP contains all projects that have been identified as regionally significant, several projects on the turnpike system are listed.

Additionally, the federal regulations governing the MPO TIPs, MTPs, and the associated air quality conformity determination for nonattainment and maintenance areas, including 23 CFR §450.324(i) and 40 CFR §93, stipulate that the availability of funds must be demonstrated for all included projects. To provide information to the MPOs and to demonstrate financial constraint of the STIP, anticipated revenue and expenditures for the turnpike system have been documented in the Financial Constraint Summary tables. As illustrated in those tables, the turnpike system is financially constrained overall within each year of the STIP.

Statewide Maintenance and Operating Budget (Turnpike)*

Bonds

Bonding is one of several financial strategies used by the State of NH to finance transportation improvements. The State of New Hampshire, through action of the NH Legislature, can issue and utilize Grant Anticipation Revenue Vehicle (GARVEE) bonds. A GARVEE bond is issued by the State with the presumption that federal funds will continue to be available to pay for debt service in the future. GARVEE bonds provide a short-term influx of funding to advance projects that may otherwise take many years to construct. GARVEE bonds may only be issued with the concurrence of FHWA. A Memorandum of Agreement (MOA) is issued between the NHDOT, NH Treasurer, and FHWA to facilitate each bond issuance. Authorization for the issuance of these revenue bonds is provided for in RSA 228-A:2.

^{**}Revenue estimate are expected to change

<u>Transportation Infrastructure Finance and Innovation Act (TIFIA)</u>

Transportation Infrastructure Finance and Innovation Act is a federal credit program for major transportation investments. TIFIA was enacted in 1998 as part of the federal legislation (TEA-21). In subsequent legislation, substantial changes were made in the TIFIA credit program by expanding eligibility to include related projects that were grouped together. The goal of this program is to leverage limited federal resources and stimulate private capital investment in transportation infrastructure by providing credit assistance in the form of direct loans, loan guarantees, and standby lines of credit to projects of national or regional significance.

The State of New Hampshire applied and was approved for a TIFIA direct loan for the I-93 Corridor Projects in the spring of 2016. By using the TIFIA loan the Department will be able to pledge approximately \$19 - 20M in funds per year, for nine years, for resurfacing and the rehabilitation of rural state roads and red-listed bridges by deferring principal payments on the loan until 2026. Debt service for the TIFIA loan will be paid with proceeds from the gas tax increase in SB 367.

Operations & Maintenance for Federal-Aid Highways

As outlined in 23 CFR §450.216(m), the STIP must include financial information on revenues and expenditures to adequately operate and maintain Federal-aid highways. The estimates provided below represent all available funds to address regular maintenance and operation needs of the Federal-aid system in NH. The NHDOT asserts that the Federal-aid system in NH is adequately maintained through the maintenance and operations budget of the Department and through the more substantial maintenance and preservation projects funded through specific state and Federal-aid categories.

Other Resources

The 2023-2026 NH STIP documents the amount of funds contributed by other sources to match Federal-aid funds for every project. Other sources of funds to match Federal-aid dollars are typically municipalities, but also include private entities, other public entities, and other states.

NHDOT Highway Tiers- Definitions

The NHDOT is focused on managing the state's road network as efficiently and effectively as possible. While every road is critical to the people and businesses that rely upon it, each road also serves a different number of users and provides different levels of mobility. Grouping based on similarities such as connectivity, regional significance, and winter maintenance requirements provides a common framework for analysis of condition and performance, investment levels and operation and maintenance levels. To strategize the investment of scarce resources, the Department has categorized New Hampshire's Road systems into the following Tiers:

Tier 1- Interstates, Turnpikes and Divided Highway

Interstate, Turnpikes and NH Route 101 between Bedford and Hampton support the highest traffic volumes and speeds in the entire state. These multi-lane, divided highways convey the majority of commuter, tourist, and freight traffic throughout the state.

Tier 2- Statewide Corridors

Statewide Corridors, like US 202 or NH1 6, carry passengers and freight between regions of the state as well as to and from neighboring states. These roads can have moderate to high traffic volumes, particularly during morning and afternoon commutes. While functionally similar, condition and features of these corridors vary the most out of any Tier. Some of these roads are formally constructed higher-speed facilities while others are more rural roads that became high use roads as surrounding neighborhoods and communities developed.

<u>Tier 3- Regional Transportation Corridors</u>

Regional Transportation Corridors provide travel within regions, access statewide corridors, and support moderate traffic volumes at moderate speeds. Good examples include NH 112 and NH 155.

Tier 4- Local Connectors

Secondary highways and unnumbered routes as well as the bridges along them are local connectors and they provide travel between and within communities. Traffic on local connectors, such as NH 141 or Bean Rd. in Moultonborough, is usually low volume and low speed.

Tier 5- Local Roads

Locally owned roads and bridges or State-owned roads within compact limits provide varying travel functions and are maintained by communities. Traffic volumes and speeds can vary on local roads. Good examples include North State St. in Concord or Elm St. in Manchester. Though the Department does not maintain local road and bridges, it does provide assistance to communities.

Tier 6- Off Network

The Department tracks work accomplished on off network assets such as park and rides, patrol sheds or rest stop parking lots.

A map displaying the highway tiers is included in Appendix A of this document.

Public Involvement

The foundation of the transportation planning process is public involvement and the continuing, comprehensive, and cooperative involvement of MPOs, Federal and State agencies and other stakeholders in the process. The MPOs and RPCs serve to facilitate public involvement at the local and regional levels, which augments the statewide transportation public involvement processes.

In NH the development of the Ten-Year Plan, the LRTP and other planning documents are based on input from extensive public involvement efforts. The NH 2023-2032 Ten Year Plan included conducting twenty-two public hearings around the state, 1 being all virtual. Over 400 comments were heard during the hearing process with response from 766 to the online survey. These comments were taken into consideration and adjustments were made to the Draft TYP. The RPCs presented regional transportation needs that were identified and prioritized in their area, from public involvement input. Following the approval of the 10-Year Plan, the MPOs continue public outreach efforts, consistent with federal regulations, for the development of each MPOs TIP. The projects included in the first 4 years of the MPO TIP documents, collectively represent the projects included in the STIP. Each MPO conducted a public hearing and solicited public comments consistent with federal requirements. The NHDOT State STIP document was developed in conjunction with the MPO and further includes opportunity for public involvement and public comments. The STIP was subject to public review and comment, and public comment period was posted, a notice was posted in a statewide newspaper, on the internet and through each of the nine regional planning commissions.

STIP Revisions

On January 9, 2020, the NHDOT adopted the most recent STIP Revision Procedures. The STIP Revisions procedures were developed in coordination with the MPOs, and other Interagency Consultation partners and were approved by FHWA and FTA. Those procedures outline thresholds and protocols for revisions to the STIP as amendments or administrative modifications. The STIP Revision Procedures will be revised on a periodic basis per changes in federal and state requirements, or at the request from the Interagency partners. Figure 3 shows the anticipated STIP revision schedule for the calendar years 2023-2026.

Performance Based Planning & Programming

The NHDOT's Long Range Transportation Plan (LRTP), Ten Year Plan (TYP), Statewide Transportation Improvement Program (STIP), and Asset Management Plan have always supported the performance-based planning focus areas identified in MAP-21/FAST Act and will support any new recommendations by the BIL. Specifically, pavement condition, bridge condition, traffic congestion, reliability, and air quality have always been a focus for programming funds. The targets that have been developed provide a more consistent way to discuss and compare performance across the country, but they represent very little change for NHDOT other than reinforcing and clarifying expectations. As future versions of these Plans are developed, NHDOT will work to make explicit connections between projects and programs to the performance areas and targets that they are expected to impact. In those same plans, targets will be utilized to identify and discuss gaps between desired and observed performance.

This 2023-2026 STIP includes a summary chart that details how the projects identified in this STIP support the required performance categories outlined below:

Safety

- Number of fatalities
- Rate of fatalities per 100 million Vehicle Miles Traveled (VMT)
- Number of serious injuries
- Rate of serious injuries per 100 million Vehicle Miles Travelled (VMT)
- Number of non-motorized fatalities and non-motorized serious injuries

Pavement Condition

- Percentage of Pavements of the Interstate System in Good Condition
- Percentage of Pavements of the Interstate System in Poor Condition
- Percentage of Pavements of the Non-Interstate NHS in Good Condition
- Percentage of Pavements of the Non-Interstate NHS in Poor Condition

Bridge Condition

- Percentage of NHS Bridges Classified as in Good Condition
- Percentage of NHS Bridges Classified as in Poor Condition

Reliability/Congestion/Air Quality

- Percent of the Person-Miles Traveled on the Interstate That Are Reliable
- Percent of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable
- Truck Travel Time Reliability (TTTR) Index
- Annual Hours of Peak Hour Excessive Delay Per Capita: Urbanized Area 1
- Percent of Non-Single Occupancy Vehicle (Non-SOV) Travel: Urbanized Area 1
- Total Emission Reductions: CO

Transit-Capital

- Percentage of revenue vehicles exceeding Useful Life Benchmark (ULB)
- Percentage of non-revenue service vehicles exceeding Useful Life Benchmark (ULB)

- Percentage of facilities rated under 3.0 on the Transit Economic Requirements Model (TERM) scale
- Percentage of track segments under performance restriction

Transit - Safety

- Total Fatalities
- Rate of fatalities per 500,000 Vehicle Revenue Miles
- Total Injuries
- Rate of injuries per 500,000 Vehicle Revenue Miles
- Total Safety events
- Rate of safety events per 500,000 Vehicle Revenue Miles
- System Reliability (number of miles driven between major mechanical failures)

The performance areas of Safety, Pavement conditions, Bridge condition, Reliability/Congestion/Air Quality and Transit represent the relevant performance category groupings. All projects in the STIP have been associated with a *predominant* performance planning category that best meets with the project's intent, though the identified performance planning category associations do not represent the *only* performance planning benefits accrued by the projects identified.

More information regarding the performance targets identified and other NHDOT related performance-based planning details are provided in the Transportation Performance Management State Biennial Performance Report for Performance Period 2018-2021 for New Hampshire, which is included in Appendix B.

STIP Findings Status

The following list has been provided to track NHDOT's progress in responding to prior STIP related federal findings. The findings listed below represent a summation of and status report on findings and recommendations from prior federal STIP approval transmittals.

Item	Description	Status	Details
Finding	Performance Based Planning and Programming	COMPLETE	The projects contributing to transit safety performance have now been included in the Performance Based Planning & Programming section of the STIP.
Finding	WIM and Classification Count Reporting	ONGOING	NHDOT continues to work through the Plan of Corrective Action (CAP) related to this finding – including monthly meetings with FHWA-NH division staff re: progress and next steps. NHDOT is actively working on several traffic research projects in response to these findings.
Finding	Statewide Public Involvement Process	ONGOING	NHDOT is currently finalizing a draft update to these procedures and anticipates going to a 45-day public comment in 2024.
Finding	Statewide Long Range Transportation Plan (LRTP)	ONGOING	NHDOT is working with the Governor and Executive Council to confirm selection of an outside Consultant for assistance with this effort. Consultant confirmation is expected to be completed by March 2024, with continued work to update the plan to better align with the TAMP, TYP and updated federal regulations over the course of CY 2024 into 2025.
Finding	STIP Financial Constraint	ONGOING	NHDOT continues to improve our approach to financial constraint in response to federal findings and recommendations. The 2023-2026 STIP demonstrates constraint by funding category in 2024, and on a bottom-line basis for 2025-2026. NHDOT will continue to refine our internal approach to programming funds to further improve our approach to the latter years of the STIP.
Finding	STIP Project Listings	ONGOING	NHDOT continues to work to identify and revise existing project scopes that lack appropriate details. NHDOT also continues to improve upon the details contained within the programmatic report as it relates to transit programs.

		\$8,769,026	\$0	\$0	\$8,769,026			

RPC: NCC Regionally Significant: No Managed By: DOT CAA Code: E-10

- 1.) Project Name and unique state project number: The project name generally references the municipality where the project is located.
- 2.) Route/Road/Entity: The facility where the project is located that involves the state route, local road name or facility name (Park and Ride for example).
- 3.) Scope: Brief description of what the project is intended to accomplish, where it is located and the end points of the project (including approximate distances where appropriate).
- **4.) Phase:** NHDOT uses the following phases in the STIP:
 - **PE:** Preliminary Engineering engineering design that precedes construction.

ROW: Right-of-Way – acquisition of property or access to accomplish the proposed project.

CON: Construction – implementation of the designed project. Includes Construction Engineering and oversight.

OTHER: Used for those projects that do not involve traditional engineering/construction such as planning studies, transit services and research projects

- 5.) Fiscal year: NHDOT uses the Federal Fiscal Year (FFY) for financial planning and programming. FFY runs October 1 – September 30
- **6.)** Funding breakdown: The STIP utilizes 3 funding types:

Federal: funds provided by the Federal government from a variety of sources.

State: Funds provided by the State of NH. These could be Toll Credit match, special fund sources or general fund sources.

Other: Any number of sources that are not federal and not state. Generally these funds are matching funds provided by project sponsors, but can also include non-participating funds provided by other states like Maine or Vermont for bridge projects that are shared between states.

7.) Funding details: This column identifies the Sources of the funds identified under item #6.

	Year	Federal	State	Other	Total	Funding
PE 2	2023	\$448,800	\$0	\$0	\$448,800	National Highway Performance, Toll Credit
ROW	2023	\$770,075	\$0	\$0	\$770,075	National Highway Performance, Toll Credit
Construction	2025	\$892,700	\$0	\$0	\$892,700	National Highway Performance, Toll Credit
Construction	2026	\$6,657,451	\$0	\$0	\$6,657,451	National Highway Performance, Toll Credit
		\$8,769,026	\$0	\$0	\$8,769,026	

- **8.)** All project costs: this item identifies the costs associated with this project not included in the 4 years of the STIP as published. These funds could include engineering design completed prior to the STIP, or funds associated with other project tasks such as construction in years beyond the STIP.
- **9.**) Regional significance: non-grouped (programmatic) projects that serves regional transportation needs and would normally be included in the MPOs network modelling efforts. For the NH STIP this is a 'yes'/'no' item.
- 10.) Managed by: The designated entity responsible for the implementation of the specified project.
- **11**.) <u>Clean Air Act (CAA) Code:</u> This is the designation that this project has been classified for Clean Air Act/Air Quality Conformity purposes. More details re: the specific CAA codes may be found in the NH STIP Revision Procedures.
- **12**.) <u>Impacted region:</u> The RPC territory that will be served by the proposed project is identified here. There are 9 RPCs in NH and a map of these areas may be found in Appendix ___.
- **13**.) <u>Approval status:</u> Proposed STIP actions (Minor Revision, Amendment or Update) when introduced, but not yet adopted as proposed will be identified as 'Proposed'. Once a STIP action has been approved, this area will show 'Approved'
- **14**.) <u>Docket number:</u> The sequential numbering of the STIP action. The following is a helpful guide to understanding the STIP naming convention:

A: Amendment. This letter will be followed by a number indicating which Amendment to the STIP the docket represents. A '0' value indicates that this is an update to a new 4 year period. For Minor Revisions, the docket number would be presented as Current (A)mendment.(M)inor Revision.Month.Year for example: A4.M.12.22 – This represents minor revisions to Amendment 4 as of December 2022.

	OVERVIEW SECTION	1
01	Please use this space to provide any general comments that may assist FHWA in its review of your submission. You can use this space to provide greater context for your targets and current condition/performance, provide additional background detail or clarification, note any assumptions, or discuss complications. This text may be shared verbatim online. (Optional)	
02	As of July 31, 2022, FHWA has not received the required significant progress additional reporting information, and it must be included in the PMF. Did you upload the additional reporting for target(s) achievement to the PMF on the "attachment" tab?	
O2a	Please explain why the additional reporting for target(s) achievement was not uploaded to the PMF as required.	
	OVERVIEW SECTION	2
03	Who should FHWA contact with questions?	Nicholas Alexander
04	What is the phone number for this contact? Please provide 10-digit number (area code and phone number) without formatting. (e.g., 1234567890)	6032711620
O5	What is the email address for this contact?	Nicholas.J.Alexander@dot.nh.gov

	Pavement Performance Overvie	w
P1	Please use this space to provide any general comments that may assist FHWA in its review of this part of the submission. You can use this space to provide greater context for your targets and current condition, provide additional background detail or clarification, note any assumptions, or discuss complications. (Optional)	
	Interstate System Performance Ove	
P2	Discuss how the actual condition achieved for the statewide Interstate System [23 CFR 490.105(c)(1)] during the performance period, which indicates the near-term direction or trend, supports both the long-term national infrastructure condition performance goal of maintaining the highway infrastructure asset system in a state of good repair identified in 23 U.S.C. §150(b), and goal of improving project and investment decision making through performance-based planning and programming [23 U.S.C. 150(a)] Include an assessment of the effectiveness of the investment strategies documented in the State asset management plan required under 23 U.S.C. 119(e) related to pavement condition on the statewide Interstate NHS measure area. [23 CFR 490.107(b)(3)(ii)(C)]	The actual condition of the Interstate System in NH was maintained in mostly good condition (62.4%) with minimal poor condition (0.0%). The targets for this reporting period were established prior to the implementation of modern pavement management system with condition forecasting at NHDOT. Information from the recent NH TAMP (2022), based on a modern pavement management system, includes SOGR targets for pavements at 57% good and 0.5% poor. Continued maintenance of pavements on the Interstate System better than, but close to, the SOGR targets demonstrates effective investment strategies. In addition, while the SOGR targets were revised based on more modern forecasting and analysis, the pavement preservation and targeted rehabilitation programs show support toward the national goal of maintaining infrastructure in a state of good repair. The use of condition metrics and targets as part of the paving program and during biennial updates through the TYP and STIP also show alignment with the national goal of improving project and investment decision making.
	Statewide Performance Target for the Percentage of Pavements of th	ne Interstate System in Good Condition
P3	The baseline statewide Percentage of Pavements on the Interstate System in Good Condition. For the 2018-2021 performance period only, the baseline value is the 2-year actual condition per the phase-in of new requirements for this measure. The actual 2-year condition is derived from the latest data collected through the midpoint of the performance period, and is the same value provided for the 2020 Mid Performance Period Progress Report. [23 CFR 490.105(e)(7)(iii) and 23 CFR 490.107(b)(2)(ii)(A)]	64.7
P4	The 4-year statewide Percentage of Pavements on the Interstate System in Good Condition. This value is the actual 4-year condition derived from the latest data collected through the end of the 2018-2021 performance period. [23 CFR 490.107(b)(3)(ii)(A)]	62.4
P5	The 4-year target for the statewide Percentage of Pavements on the Interstate System in Good Condition for the 2018-2021 Performance Period. [23 CFR 490.107(b)(1)(ii)(A) and 23 CFR 490.107(b)(2)(ii)(E)]	65.0

if they were effective in achieving the intended condition. For the statewide Percentage of Pavements on the Interstate System in Good Condition, this discussion: 1) Shall compare the actual 4-year condition to the 4-year target and document the reasons the target was or was not met, and [23 CFR 490.107(b)(3)(ii)(B)] 2) Shall document if the State DOT expects that significant progress was or was not made toward the 4-year target, and summarize the accomplishments achieved during the performance period that demonstrate whether significant progress is expected or not. if they were effective in achieving the intended condition. For the statewide annually in a pavement preservation program for the Percentage of Pavements on the Interstate System in Poor Condition, this discussion: interstates that includes cost effective treatments like cracksealing and bonded wearing course paving. The locations for 1)Shall compare the actual 4-year condition to the 4-year target and document the these treatments are identified using a combination of reasons the target was or was not met, and [23 CFR 490.107(b)(3)(ii)(B)] condition data and treatment history. The preservation program is identified in the NH STIP, TYP, and is discussed in 2) Shall document if the State DOT expects that significant progress was or was not the TAMP (2022). In addition to preservation, targeted made toward the 4-year target, and summarize the accomplishments achieved during rehabilitation was undertaken at key locations identified the performance period that demonstrate whether significant progress is expected or through analysis of pavement condition history and site not. [23 CFR 490.107(b)(3)(ii)(E)] conditions. These activities were successful in achieving both the SOGR targets and the 4-year target. These targets were established before the implementation of a modern pavement management system at NHDOT. That system is now in place and operational. 1) The actual 4-year poor condition of 0.0% is 0.5% lower than the target condition of 0.5% and 0.3% lower than the baseline. The target condition was met. 2) NHDOT is confident that the resurfacing program is effective at achieving the state of good repair targets of 57% good condition and 0.5% poor condition as demonstrated by the 4-year actual condition. In addition significant progress toward the 4-year target was made. P12 Did any of the extenuating circumstance(s) identified in 23 CFR 490.109(e)(5) prevent No the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of Pavements on the Interstate System in Poor Condition for the 2018-2021 Performance? [23 CFR 490.107(b)(3)(ii)(F)] P12a Select the extenuating circumstance(s) that prevented the State DOT from making significant progress toward achieving its 4-year target. [23 CFR 490.109(e)(5)] P12b Explain how the extenuating circumstance(s), listed in 23 CFR 490.109(e)(5) prevented the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of Pavements on the Interstate System in Poor Condition, and quantify the impacts that resulted from these circumstances. [23 CFR 490.107(b)(3)(ii)(F) **Pavement Performance on the Non-Interstate NHS Overview** Discuss how the actual pavement condition achieved for the statewide Non-Interstate The actual condition of the non-Interstate NHS in NH was NHS [23 CFR 490.105(c)(2)] during the performance period, which indicates the nearmaintained in mostly good condition (78.3%) with a small term direction or trend, supports both the long-term national infrastructure condition amount of poor condition (5.1%). The targets for this performance goal of maintaining the highway infrastructure asset system in a state of reporting period were established prior to the good repair identified in 23 U.S.C. §150(b), and goal of improving project and implementation of modern pavement management system with condition forecasting at NHDOT. Information from the investment decision making through performance-based planning and programming [23 U.S.C. 150(a)] recent NH TAMP (2022), based on a modern pavement management system, includes SOGR targets for non-Interstate Include an assessment of the effectiveness of the investment strategies documented in NHS pavements using all three (3) condition metrics (IRI, the State asset management plan required under 23 U.S.C. 119(e) related to pavement rutting, and cracking) so they cannot be directly compared to condition on the statewide Non-Interstate NHS measure area. [23 CFR the IRI only values reported during this period. Considering IRI 490.107(b)(3)(ii)(C)] only, continued maintenance of pavements on the non-Interstate NHS better than targets and very near the baseline demonstrates that the investment strategies are likely effective. Achieving the performance targets and maintaining the pavement programs show support toward the national goal of maintaining infrastructure in a state of good repair. Statewide Performance Target for the Percentage of Pavements of the Non-Interstate NHS in Good Condition

During the performance period NHDOT continued investment

Discuss the decisions and/or investments that contributed to the actual condition, and

P14	The baseline statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition. This value is from the 2018 Baseline Performance Period Report, and is the condition derived from the latest data collected through the beginning date of the 2018 2021 performance period. [23 CFR 490.107(b)(1)(ii)(B)]	73.1
	For the 2018-2021 performance period only, FHWA calculated this value using IRI only (or PSR values for road sections where speed is less than 40 mph). [23 CFR 490.313(e)]	
P15	The 2-year statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition. The actual 2-year condition is derived from the latest data collected through the midpoint of the 2018-2021 performance period, and is the same value provided for the 2020 Mid Performance Period Progress Report. [23 CFR 490.107(b)(2)(ii)(A)]	72.8
	For the 2018-2021 performance period only, FHWA calculated this value using IRI only (or PSR values for road sections where speed is less than 40 mph). [23 CFR 490.313(e)]	
P16	The State DOT reported its 2-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition based on "Full Distress + IRI" data in the 2018 Baseline Performance Period Report. Thus, FHWA also calculated the actual condition using "Full Distress + IRI" data that was provided in the 2018 Mid Performance Period Progress Report. [23 CFR 490.313 (c) and (d)]	
P17	The 2-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition for the 2018-2021 Performance Period that was reported in the 2018 Baseline Performance Period Report. [23 CFR 490.107(b)(1)(ii)(A)]	65.0
P18	The 4-year statewide Percentage of Pavements on the Non-Interstate in Good Condition. This value is the actual 4-year condition derived from the latest data collected through the end of the 2018-2021 performance period. [23 CFR 490.107(b)(3)(ii)(A)] For the 2018-2021 performance period only, FHWA has calculated this value using IRI only (or PSR values for road sections where speed is less than 40 mph). [23 CFR 490.313(e)]	78.3
P19	The State DOT reported that its 4-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition was based on "Full Distress + IRI" data for the 2018-2021 performance period. Thus, FHWA also calculated the actual condition using "Full Distress + IRI" data. [23 CFR 490.313 (c) and (d)]	
	FHWA will use this value to determine whether the actual condition level is equal to or better than the established 4-year target as part of the 4-year significant progress determination. [23 CFR 490.109(e)(2)(ii)]	
P20	The 4-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition for the 2018-2021 Performance Period. [23 CFR 490.107(b)(1)(ii)(A) and 23 CFR 490.107(b)(2)(ii)(E)]	65.0

P21	Discuss the decisions and/or investments that contributed to the actual condition, and if they were effective in achieving the intended condition. For the statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition, this discussion: 1)Shall compare the actual 4-year condition to the 4-year target and document the reasons the target was or was not met, and [23 CFR 490.107(b)(3)(ii)(B)] 2) Shall document if the State DOT expects that significant progress was or was not made toward the 4-year target, and summarize the accomplishments achieved during the performance period that demonstrate whether significant progress is expected or not. [23 CFR 490.107(b)(3)(ii)(E)]	During the performance period NHDOT continued investment annually in a pavement preservation and maintenance program for the non-Interstate NHS that includes cost effective treatments like crack-sealing, bonded wearing course paving, and traditional overlays. The locations for these treatments are identified using a combination of condition data, site information, and treatment history. The paving program is identified in the NH STIP, TYP, and is discussed in the TAMP (2022). In addition to preservation and maintenance, targeted rehabilitation was undertaken at key locations identified through analysis of pavement condition history and site conditions. These activities were successful in achieving the 4-year target. These targets were established using IRI only and before the implementation of a modern pavement management system at NHDOT. That system is now in place and operational. 1) The actual 4-year good condition 78.3 is 13.3% higher than the target condition of 65.0% and 5.2% higher than the baseline. The target condition was met. 2) NHDOT is confident that the resurfacing program approach is effective at achieving the state of good repair outlined in the NH TAMP (2022) and was shown effective in achieving these 4-year targets.
	Did any of the extenuating circumstance(s) identified in 23 CFR 490.109(e)(5) prevent the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition for the 2018-2021 Performance? [23 CFR 490.107(b)(3)(ii)(F)]	No
P22a	Select the extenuating circumstance(s) that prevented the State DOT from making significant progress toward achieving its 4-year target. [23 CFR 490.109(e)(5)]	
P22b	Explain how the extenuating circumstance(s), listed in 23 CFR 490.109(e)(5) prevented the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Good Condition, and quantify the impacts that resulted from these circumstances. [23 CFR 490.107(b)(3)(ii)(F)]	
D22	Statewide Performance Target for the Percentage of Pavements of the	
P23	The baseline statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition. This value is from the 2018 Baseline Performance Period Report, and is the condition derived from the latest data collected through the beginning date of the 2018 2021 performance period. [23 CFR 490.107(b)(1)(ii)(B)]	9.1
	For the 2018-2021 performance period only, FHWA calculated this value using IRI only (or PSR values for road sections where speed is less than 40 mph).	
P24	The 2-year statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition. The actual 2-year condition is derived from the latest data collected through the midpoint of the 2018-2021 performance period, and is the same value provided for the 2020 Mid Performance Period Progress Report. [23 CFR 490.107(b)(2)(ii)(A)] For the 2018-2021 performance period only, FHWA calculated this value using IRI only (or PSR values for road sections where speed is less than 40 mph). [23 CFR 490.313(e)]	8.3
P25	The State DOT reported its 2-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition based on "Full Distress + IRI" data in the 2018 Baseline Performance Period Report. Thus, FHWA also calculated an actual condition using "Full Distress + IRI" data that was provided in the 2020 Mid Performance Period Progress Report. [23 CFR 490.313 (c) and (d)]	
P26	The 2-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition for the 2018-2021 Performance Period that was reported in the 2018 Baseline Performance Period Report. [23 CFR 490.107(b)(1)(ii)(A)]	12.0

The 4-year statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition. This value is the actual 4-year condition derived from the latest data collected through the end of the 2018-2021 performance period. [23 CFR	5.1
490.107(b)(3)(ii)(A)] For the 2018-2021 performance period only, FHWA calculated this value using IRI only (or PSR values for road sections where speed is less than 40 mph). [23 CFR 490.313(e)]	
The State DOT reported that its 4-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition was based on "Full Distress + IRI" data for the 2018-2021 performance period. Thus, FHWA also calculated the actual condition using "Full Distress + IRI" data. [23 CFR 490.313 (c) and (d)] FHWA will use this value to determine whether the actual condition level is equal to or	
better than the established 4-year target as part of the 4-year significant progress determination. [23 CFR 490.109(e)(2)(ii)]	
The 4-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition for the 2018-2021 Performance Period. [23 CFR 490.107(b)(1)(ii)(A) and 23 CFR 490.107(b)(2)(ii)(E)]	12.0
Discuss the decisions and/or investments that contributed to the actual condition, and if they were effective in achieving the intended condition. For the statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition, this discussion:	During the performance period NHDOT continued investment annually in a pavement preservation and maintenance program for the non-Interstate NHS that includes cost effective treatments like crack-sealing, bonded wearing course
1)Shall document the actual 4-year condition to the 4-year target and document the reasons the target was or was not met, and [23 CFR 490.107(b)(3)(ii)(B)]	paving, and traditional overlays. The locations for these treatments are identified using a combination of condition data, site information, and treatment history. The paving
2)Shall document if the State DOT expects that significant progress was or was not made toward the 4-year target, and summarize the accomplishments achieved during the performance period that demonstrate whether significant progress is expected or not. [23 CFR 490.107(b)(3)(ii)(E)] Did any of the extenuating circumstance(s) identified in 23 CFR 490.109(e)(5) prevent	program is identified in the NH STIP, TYP, and is discussed in the TAMP (2022). In addition to preservation and maintenance, targeted rehabilitation was undertaken at key locations identified through analysis of pavement condition history and site conditions. These activities were successful in achieving the 4-year target. These targets were established using IRI only and before the implementation of a modern pavement management system at NHDOT. That system is now in place and operational. 1) The actual 4-year poor condition 5.1% is 6.9% lower than the target condition of 12.0% and 4.0% lower than the baseline. The target condition was met. 2) NHDOT is confident that the resurfacing program approach is effective at achieving the state of good repair outlined in the NH TAMP (2022) and was shown effective in achieving these 4-year targets.
the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition for the 2018-2021 Performance? [23 CFR 490.107(b)(3)(ii)(F)]	NO
Select the extenuating circumstance(s) that prevented the State DOT from making significant progress toward achieving its 4-year target. [23 CFR 490.109(e)(5)]	
Explain how the extenuating circumstance(s), listed in 23 CFR 490.109(e)(5) prevented the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of Pavements on the Non-Interstate NHS in Poor Condition, and quantify the impacts that resulted from these circumstances. [23 CFR 490.107(b)(3)(ii)(F)]	

	Bridge Performance Overview		
B1	Please use this space to provide any general comments that may assist FHWA in its review of this part of the submission. You can use this space to provide greater context for your targets and current condition, provide additional background detail or clarification, note any assumptions, or discuss complications. (Optional)		
B2	Discuss how the actual condition achieved for the statewide Bridges on the NHS [23 CFR 490.105(c)(3)] during the performance period, which indicates the near-term direction or trend, supports both the long-term national infrastructure condition performance goal of maintaining the highway infrastructure asset system in a state of good repair identified in 23 U.S.C. §150(b), and goal of improving project and investment decision making through performance-based planning and programming [23 U.S.C. 150(a)] Include an assessment of the effectiveness of the investment strategies documented in the State asset management plan required under 23 U.S.C. 119(e) related to the bridge condition measure area. [23 CFR 490.107(b)(3)(ii)(C)]	The actual condition of the bridges on the NHS in NH was maintained in mostly good condition (58.4%) with minimal poor condition (4.3%). The targets for this reporting period were established prior to the implementation of a modern bridge management system with condition forecasting at NHDOT. Information from the recent NH TAMP (2022), based on a modern bridge management system, includes SOGR targets for bridges at 39.4% good and 5.0% poor. Continued maintenance of bridges on the NHS better than the SOGR and 4-year targets demonstrates effective investment strategies. The achievement of the 4-year targets and continued investment in bridges on the NHS show support toward the national goal of maintaining infrastructure in a state of good repair. The use of condition metrics and targets as part of the bridge program and during biennial updates through the TYP and STIP also show alignment with the national goal of improving project and investment decision making.	
	Statewide Performance Target for Bridges on the NHS Clas	ssified as in Good Condition	
В3	The baseline statewide Percentage of deck area of Bridges on the NHS Classified as in Good Condition. This value is from the 2018 Baseline Performance Period Report, and is the condition derived from the latest data collected through the beginning date of the 2018-2021 performance period. [23 CFR 490.107(b)(1)(ii)(B)]	57.0	
B4	The 2-year statewide Percentage of deck area of Bridges on the NHS Classified as in Good Condition. The actual 2-year condition is derived from the latest data collected through the midpoint of the 2018-2021 performance period, and is the same value provided for the 2020 Mid Performance Period Progress Report. [23 CFR 490.107(b)(2)(ii)(A)]	60.5	
B5	The 2-year target for the statewide Percentage of deck area of Bridges on the NHS Classified as in Good Condition for the 2018-2021 Performance Period that was reported in the 2018 Baseline Performance Period Report. [23 CFR 490.107(b)(1)(ii)(A)]	57.0	
B6	The 4-year statewide Percentage of deck area of Bridges on the NHS Classified as in Good Condition. This value is the actual 4-year condition derived from the latest data collected through the end of the 2018-2021 performance period. [23 CFR 490.107(b)(3)(ii)(A)]	58.4	
B7	The 4-year target for the statewide Percentage of deck area of Bridges on the NHS Classified as in Good Condition for the 2018-2021 Performance Period. [23 CFR 490.107(b)(1)(ii)(A) and 23 CFR 490.107(b)(2)(ii)(E)]	57.0	

B8	Discuss the decisions and/or investments that contributed to the actual condition, and if they were effective in achieving the intended condition. For the statewide Percentage of deck area of Bridges on the NHS Classified as in Good Condition, this discussion: 1) Shall compare the actual 4-year condition to the 4-year target and document the reasons the target was or was not met, and [23 CFR 490.107(b)(3)(ii)(B)] 2) Shall document if the State DOT expects that significant progress was or was not made toward the 4-year target, and summarize the accomplishments achieved during the performance period that demonstrate whether significant progress is expected or not. [23 CFR 490.107(b)(3)(ii)(E)]	During the performance period NHDOT continued investment annually in a bridge preservation and program for the NHS that includes cost effective treatments like joint work, painting, and deck patching with new protective membranes. The bridges eligible for these treatments are identified using a combination of condition data, site information, and history. The bridge preservation program is identified in the NH STIP, TYP, and is discussed in the TAMP (2022). In addition to preservation, targeted rehabilitation and replacement was undertaken at certainly bridges where conditions were not appropriate for preservation. These activities were successful in achieving the 4-year target. These targets were established before the implementation of a modern bridge management system at NHDOT. That system is now in place and operational. 1) The actual 4-year good condition 58.4% is 1.4% higher than the target condition of 57.0% and 1.4% higher than the baseline. The target condition was met. 2) NHDOT is confident that the bridge program approach is effective at achieving the state of good repair outlined in the NH TAMP (2022) and was shown effective in achieving these 4-year targets.
	Did any of the extenuating circumstance(s) identified in 23 CFR 490.109(e)(5) prevent the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of deck area of Bridges on the NHS Classified as in Good Condition for the 2018-2021 Performance? [23 CFR 490.107(b)(3)(ii)(F)]	No No
B9a	Select the extenuating circumstance(s) that prevented the State DOT from making significant progress toward achieving its 4-year target. [23 CFR 490.109(e)(5)]	
	Explain how the extenuating circumstance(s), listed in 23 CFR 490.109(e)(5) prevented the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of deck area of Bridges on the NHS Classified as in Good Condition, and quantify the impacts that resulted from these circumstances. [23 CFR 490.107(b)(3)(ii)(F)]	
	Statewide Performance Target for Bridges on the NHS Cla	
	The baseline statewide Percentage of deck area of Bridges on the NHS Classified as in Poor Condition. This value is from the 2018 Baseline Performance Period Report, and is the condition derived from the latest data collected through the beginning date of the 2018-2021 performance period. [23 CFR 490.107(b)(1)(ii)(B)]	7.0
	The 2-year statewide Percentage of deck area of Bridges on the NHS Classified as in Poor Condition. The actual 2-year condition derived from the latest data collected through the midpoint of the 2018-2021 performance period that was reported in the 2020 Mid Performance Period Progress Report. [23 CFR 490.107(b)(2)(ii)(A)]	4.5
B12	The 2-year target for the statewide Percentage of deck area of Bridges on the NHS Classified as in Poor Condition for the 2018-2021 Performance Period that was reported in the 2018 Baseline Performance Period Report. [23 CFR 490.107(b)(1)(ii)(A)]	7.0
B13	The 4-year statewide Percentage of deck area of Bridges on the NHS Classified as in Poor Condition. This value is the actual 4-year condition derived from the latest data collected through the end of the 2018-2021 performance period. [23 CFR 490.107(b)(3)(ii)(A)]	4.3
B14	The 4-year target for the statewide Percentage of deck area of Bridges on the NHS Classified as in Poor Condition for the 2018-2021 Performance Period. [23 CFR 490.107(b)(1)(ii)(A) and 23 CFR 490.107(b)(2)(ii)(E)]	7.0

815	Discuss the decisions and/or investments that contributed to the actual condition, and if they were effective in achieving the intended condition. For the statewide Percentage of deck area of Bridges on the NHS Classified as in Poor Condition, this discussion: 1) Shall compare the actual 4-year condition to the 4-year target and document the reasons the target was or was not met, and [23 CFR 490.107(b)(3)(ii)(B)] 2) Shall document if the State DOT expects that significant progress was or was not made toward the 4-year target, and summarize the accomplishments achieved during the performance period that demonstrate whether significant progress is expected or not. [23 CFR 490.107(b)(3)(ii)(E)]	During the performance period NHDOT continued investment annually in a bridge preservation and program for the NHS that includes cost effective treatments like joint work, painting, and deck patching with new protective membranes. The bridges eligible for these treatments are identified using a combination of condition data, site information, and history. The bridge preservation program is identified in the NH STIP, TYP, and is discussed in the TAMP (2022). In addition to preservation, targeted rehabilitation and replacement was undertaken at certainly bridges where conditions were not appropriate for preservation. These activities were successful in achieving the 4-year target. These targets were established before the implementation of a modern bridge management system at NHDOT. That system is now in place and operational. 1) The actual 4-year good condition 4.3% is 2.7% lower than the target condition was met. 2) NHDOT is confident that the bridge program approach is effective at achieving the state of good repair outlined in the NH TAMP (2022) and was shown effective in achieving these 4 year targets.
B16	Did any of the extenuating circumstance(s) identified in 23 CFR 490.109(e)(5) prevent the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of deck area of Bridges on the NHS Classified as in Poor Condition for the 2018-2021 Performance? [23 CFR 490.107(b)(3)(ii)(F)]	No
B16a	Select the extenuating circumstance(s) that prevented the State DOT from making significant progress toward achieving its 4-year target. [23 CFR 490.109(e)(5)]	
B16b	Explain how the extenuating circumstance(s), listed in 23 CFR 490.109(e)(5) prevented the State DOT from making significant progress toward achieving its 4-year target for the statewide Percentage of deck area of Bridges on the NHS Classified as in Poor Condition, and quantify the impacts that resulted from these circumstances. [23 CFR 490.107(b)(3)(ii)(F)]	

	Travel Time Reliability Performance Overview		
R1	Please use this space to provide any general comments that may assist FHWA in its review of this part of the submission. You can use this space to provide greater context for your targets and current performance, provide additional background detail or clarification, note any assumptions, or discuss complications. (Optional)		
R2	Discuss how the actual performance achieved for the statewide Travel Time Reliability [23 CFR 490.105(c)(4)] during the performance period, which indicates the near-term direction or trend, supports both the long-term national system reliability performance goal of improving the efficiency of the surface transportation system identified in 23 U.S.C. §150(b) and the goal of improving project and investment decision making through performance-based planning and programming. [23 U.S.C. 150(a)]	The actual performance regarding travel time reliability on the Interstate and non-Interstate NHS in NH show performance better than the 4-year targets. In addition, comparing the baseline to the actual results does not show any trend toward lower reliability. NHDOT continues to make investments operationally through our TSMO and traffic bureaus as well as strategically through continued infrastructure investments. Programs supporting these activities are identified in the biennially updated and coordinated NH TYP and STIP. Information from the NPMRDS, real-time sensors, camera data, and after incident reports are utilizing in conjunction with these targets for decision making and program planning. The positive trends, program development, and managing to these targets demonstrate support for the both the long-term national system reliability performance goal and the goal of improving project and investment decision making.	
	Statewide Performance Target for the Percent of the Person-Miles Tra	veled on the Interstate That Are Reliable	
R3	The baseline statewide Percent of the Person-Miles Traveled on the Interstate That Are Reliable. This value is from the 2018 Baseline Performance Period Report and is the performance derived from the latest data collected through the beginning date of the 2018-2021 performance period. [23 CFR 490.107(b)(1)(ii)(B)]		
R4	The 2-year statewide Percent of the Person-Miles Traveled on the Interstate That Are Reliable. The actual 2-year performance is derived from the latest data collected through the midpoint of the 2018-2021 performance period, and is the same value provided for the 2020 Mid Performance Period Progress Report. [23 CFR 490.107(b)(2)(ii)(A)]	100.0	
R5	The 2-year target for the statewide percent of the person-miles traveled on the Interstate that are reliable for the 2018-2021 Performance Period that was reported in the 2018 Baseline Performance Period Report. [23 CFR 490.107(b)(1)(ii)(A)]	95.0	
R6	The 4-year statewide Percent of the Person-Miles Traveled on the Interstate That Are Reliable. This value is the actual 4-year performance derived from the latest data collected through the end of the 2018-2021 performance period. [23 CFR 490.107(b)(3)(ii)(A)]	99.5	
R7	The 4-year target for the statewide Percent of the Person-Miles Traveled on the Interstate That Are Reliable for the 2018-2021 Performance Period. [23 CFR 490.107(b)(1)(ii)(A) and 23 CFR 490.107(b)(2)(ii)(E)]	95.0	
	Discuss the decisions and/or investments that contributed to the actual Performance, and if they were effective in achieving the intended performance. For the statewide Percent of the Person-Miles Traveled on the Interstate That Are Reliable, this discussion:	During the performance period NHDOT continued investment annually in system reliability, including through TSMO operations and ITS devices as well as strategically through long-term infrastructure projects. These projects and programs are identified in the biennially updated and coordinated NH TYP and STIP. These activities were successful	
	1) Shall compare the actual 4-year performance to the 4-year target and document the reasons the target was or was not met. [23 CFR 490.107(b)(3)(ii)(B)]	in achieving the 4-year target. 1) The actual 4-year performance of 99.5% is 4.5% higher than the target performance of 95% and 0.1% lower than the baseline. The target condition was met.	
	2) Shall document if the State DOT expects that significant progress was or was not made toward the 4-year target, and summarize the accomplishments achieved during the performance period that demonstrate whether significant progress is expected or not. [23 CFR 490.107(b)(3)(ii)(E)]	2) NHDOT is confident that the programs in place and the results demonstrate significant progress.	

R9	Did any of the extenuating circumstance(s) identified in 23 CFR 490.109(e)(5) prevent the State DOT from making significant progress toward achieving its 4-year target for the statewide Percent of the Person-Miles Traveled on the Interstate That Are Reliable for the 2018-2021 Performance Period? [23 CFR 490.107(b)(3)(ii)(F)]	No
R9a	Select the extenuating circumstance(s) that prevented the State DOT from making significant progress toward achieving its 4-year target. [23 CFR 490.109(e)(5)]	
R9b	Explain how the extenuating circumstance(s), listed in 23 CFR 490.109(e)(5) prevented the State DOT from making significant progress toward achieving its 4-year target for the statewide Percent of the Person-Miles Traveled on the Interstate That Are Reliable, and quantify the impacts that resulted from these circumstances, and quantify the impacts that resulted from these circumstances. [23 CFR 490.107(b)(3)(ii)(F)]	
	Statewide Performance Target for the Percent of the Person-Miles Traveled	on the Non-Interstate NHS That Are Reliable
R10	The baseline Percent of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable. For the 2018-2021 performance period only, the baseline value is the 2-year actual performance per the phase-in of new requirements for this measure. The actual 2-year performance is derived from the latest data collected through the midpoint of the performance period, and is the same value provided for the 2020 Mid Performance Period Progress Report. [23 CFR 490.105(e)(7)(iii) and 23 CFR 490.107(b)(2)(ii)(A)]	92.9
R11	The 4-year statewide Percent of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable. This value is the actual 4-year performance derived from the latest data collected through the end of the 2018-2021 performance period. [23 CFR 490.107(b)(3)(ii)(A)]	96.3
R12	The 4-year target for the statewide Percent of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable for the 2018-2021 Performance Period. [23 CFR 490.107(b)(1)(ii)(A) and 23 CFR 490.107(b)(2)(ii)(E)]	85.0
R13	Discuss the decisions and/or investments that contributed to the actual performance, and if they were effective in achieving the intended performance. For the statewide Percent of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable, this discussion: 1) Shall compare the actual 4-year performance to the 4-year target and document the	During the performance period NHDOT continued investment annually in system reliability, including through TSMO operations and ITS devices as well as strategically through long-term infrastructure projects. These projects and programs are identified in the biennially updated and coordinated NH TYP and STIP. These activities were successful
	reasons the target was or was not met. [23 CFR 490.107(b)(3)(ii)(B)] 2) Shall document if the State DOT expects that significant progress was or was not made toward the 4-year target, and summarize the accomplishments achieved during the performance period that demonstrate whether significant progress is expected or not. [23 CFR 490.107(b)(3)(ii)(E)]	in achieving the 4-year target. 1) The actual 4-year performance of 96.3% is 11.3% higher than the target performance of 85% and 3.4% higher than the baseline. The target condition was met. 2) NHDOT is confident that the programs in place and the results demonstrate significant progress.
R14	Did any of the extenuating circumstance(s) identified in 23 CFR 490.109(e)(5) prevent the State DOT from making significant progress toward achieving its 4-year target for the statewide Percent of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable for the 2018-2021 Performance Period? [23 CFR 490.107(b)(3)(ii)(F)]	No
R14a	Select the extenuating circumstance(s) that prevented the State DOT from making significant progress toward achieving its 4-year target. [23 CFR 490.109(e)(5)]	
R14b	Explain how the extenuating circumstance(s), listed in 23 CFR 490.109(e)(5) prevented the State DOT from making significant progress toward achieving its 4-year target for the statewide Percent of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable and quantify the impacts that resulted from these circumstances. [23 CFR 490.107(b)(3)(ii)(F)]	

	Freight Reliability (Movement) Performance Overview			
F1	Please use this space to provide any general comments that may assist FHWA in its review of this part of the submission. You can use this space to provide greater context for your targets and current performance, provide additional background detail or clarification, note any assumptions, or discuss complications. (Optional)			
F2	Discuss how the actual performance achieved for statewide freight movement on the Interstate System [23 CFR 490.105(c)(6) during the performance period, which indicates the near-term direction or trend, supports both the long-term national freight movement performance goal of improving the National Highway Freight Network, strengthening access to trade markets, and supporting economic development identified in 23 U.S.C. §150(b) and the goal of improving project and investment decision-making through performance-based planning and programming. [23 U.S.C. 150(a)]	The actual performance regarding freight reliability on the Interstate System in NH show performance better than the 4-year target. In addition, comparing the baseline to the actual results shows a positive trend in reliability. NHDOT continues to make investments operationally through our TSMO and traffic bureaus as well as strategically through continued infrastructure investments. Programs supporting these activities are identified in the biennially updated and coordinated NH TYP and STIP. Information from the NPMRDS, real-time sensors, camera data, and after incident reports are utilizing in conjunction with these targets for decision making and program planning. In addition, the NH Freight Plan (2019) provides key information, including bottlenecks, that are incorporated into broader planning and programming activities. The positive trends, program development, and managing to these targets demonstrate support for the both the long-term national goal of improving the National Highway Freight Network and the goal of improving project and investment decision making.		
F3	Discuss the State DOT's efforts to address congestion at truck freight bottlenecks through comprehensive freight improvement efforts of State Freight Plan or MPO freight plans; the Statewide Transportation Improvement Program (STIP) and MPO Transportation Improvement Programs (TIP); regional or corridor level efforts; other related planning efforts; and operational and capital activities targeted to improve freight movement on the Interstate System, and the progress that these efforts have made towards addressing freight bottlenecks. [23 CFR 490.107(b)(3)(ii)(E)) If the State has prepared a State Freight Plan under 49 U.S.C. 70202, within the previous 2 years, then it may serve as the basis for addressing congestion at truck freight bottlenecks. If the State Freight Plan has not been updated since the previous State Biennial Performance Report, then an updated discussion of efforts to address congestion at truck freight bottlenecks is needed. [23 CFR 490.107(b)(3)(ii)(D) and 23 CFR 490.107(b)(3)(ii)(E)] Please upload related document(s) in the "Attachment" tab.	Substantial capacity and congestion related projects were completed within the performance period, including improvements along I-93 and I-293. These projects were part of the NH 10-year Plan, STIP, and MPO planning processes. The operations of the NHDOT regarding intelligent transportation systems, service patrol, winter maintenance, and other similar services are expected to remain largely consistent.

	Percent of Non-Single Occupancy Vehicle (Non-SOV) Travel Performance Overview			
	Please use this space to provide any general comments that may assist FHWA in its review of this part of the submission. You can use this space to provide greater context for your targets and current performance, provide additional background detail or clarification, note any assumptions, or discuss complications. (Optional)			
		The actual performance regarding non-SOV travel in the Boston UZA shows performance better than the 4-year target. In addition, comparing the baseline to the actual results shows a positive trend in the measure. The change from the baseline to the 4-year actual performance was likely exaggerated by the COVID-19 pandemic, including the rapid expansion of work from home. NHDOT continues to make investments operationally through our TSMO and traffic bureaus as well as strategically through continued infrastructure investments. Programs supporting these activities are identified in the biennially updated and coordinated NH TYP and STIP. Information from the NPMRDS, real-time sensors, camera data, and after incident reports are utilizing in conjunction with these targets for decision making and program planning. In addition, NHDOT coordinates with MASSDOT on various initiatives. The positive trends, program development, and managing to these targets demonstrate support for the both the long-term national goal reducing congestion on the NHS and the goal of improving project and investment decision making.		
Т3	The total number of applicable UZA(s) required to establish targets and report progress for the Traffic Congestion Measures in your State are:			
Urbanized Area Target #1 - Percent of Non-Single Occupan				
T4	Urbanized Area:	Boston, MANHRI		
	The baseline Percent of Non-SOV Travel for this UZA. This value is from the 2018 Baseline Performance Period Report and is the performance derived from the latest data collected through the beginning of the 2018-2021 performance period. [23 CFR 490.107(b)(1)(ii)(B)]	33.6		
Т6	The 2-year Percent of Non-SOV Travel for this UZA. The actual 2-year performance is derived from the latest data collected through the midpoint of the 2018-2021 performance period, and is the same value provided for the 2020 Mid Performance Period Progress Report. [23 CFR 490.107(b)(2)(ii)(A)] Since the baseline performance submitted in the 2018 Baseline Performance Period	34.6		
	Report was based on Method A, the 2-year performance value is based on Method A – American Community Survey (ACS). [23 CFR 490.709 (f)(2) and (3)]			
	The 2-year target for the Percent of Non-SOV Travel for this UZA for the 2018-2021 Performance Period that was reported in the 2018 Baseline Performance Period Report. [23 CFR 490.107(b)(1)(ii)(A)]	34.5		
	The 4-year Percent of Non-SOV Travel for this UZA. This value is the actual 4-year performance derived from the latest data collected through the end of the 2018-2021 performance period. [23 CFR 490.107(b)(3)(ii)(A)] Since the baseline performance submitted in the 2018 Baseline Performance Period Report was based on Method A, the 4-year performance value is based on Method A – American Community Survey (ACS). [23 CFR 490.709 (f)(2) and (3)]	36.9		
	The 4-year target for the Percent of Non-SOV Travel for this UZA for the 2018-2021 Performance Period. [23 CFR 490.107(b)(3)(ii)(A) and 23 CFR 490.107(c)(3)(ii)(A)]	35.8		

T10	Discuss the decisions and/or investments that contributed to the actual performance	
	and if they were effective in achieving the intended condition. For the Percent of Non-	
	SOV Travel for this UZA, this discussion:	

1) Shall compare the actual 4-year performance to the 4-year target and document the reasons the target was or was not met. [23 CFR 490.107(b)(3)(ii)(B)]

During the performance period NHDOT continued investment annually, including through TSMO operations and ITS devices as well as strategically through long-term infrastructure projects. These projects and programs are identified in the biennially updated and coordinated NH TYP and STIP. These activities were successful in achieving the 4-year target.

1) The actual 4-year performance of 36.9% is 1.1% higher than

- The actual 4-year performance of 36.9% is 1.1% higher than the target performance of 35.8% and 2.2% higher than the baseline. The target condition was met.
- 2) NHDOT is confident that the programs in place and the results demonstrate significant progress.

	Emissions Reduction Performance Overview			
E1	Please use this space to provide any general comments that may assist FHWA in its			
	review of this part of the submission. You can use this space to provide greater context			
	for your targets and current performance, provide additional background detail or			
	clarification, note any assumptions, or discuss complications. (Optional)			
E2	Discuss how the actual performance achieved for the Statewide Total Emissions	The CO Limited Maintenance Plan status for the City of		
	Reduction [23 CFR 490.105(c)(8)] (as measured by the individual pollutants and	Manchester and City of Nashua terminated during the		
	precursors) during the performance period, which indicates the near-term direction or	performance period.		
	trend, supports both the long-term national environmental sustainability performance			
	goal to enhance the performance of the transportation system while protecting and			
	enhancing the natural environment identified in 23 U.S.C. §150(b), and the goal of			
	improving project and investment decision making through performance-based			
	planning and programming [23 U.S.C. 150(a)] *If all applicable pollutants and			
	precursors are trending in a similar fashion you may generalize the response.			
E3	Does the State include any areas designated as nonattainment or maintenance for	No		
	PM2.5?			
	Note: Based on the response to E3, the State is not required to provide a statewide			
	target for annual emissions reductions for NOx or VOC as a significant contributor to			
	PM2.5.			
E4	If the State includes any areas designated as nonattainment or maintenance for PM2.5,			
	are NOx and/or VOC a significant contributor to PM2.5 emissions anywhere in the			
	State?			
	A significant contributor is defined as a precursor pollutant that the State or EPA has			
	made a finding that the precursor has a significant impact on particulate matter (PM)			
	air quality problem in a given area; or, the State Implementation Plan establishes			
	approved or adequate motor vehicle emissions budgets for that precursor. [40 CFR			
	93.102(b) and 40 CFR 93.119(f)]			
E5	Does the State include any areas designated as nonattainment or maintenance for	No		
	PM10?			
	Note: Paced on the recognice to EE, the State is not required to provide a statewide			
	Note: Based on the response to E5, the State is not required to provide a statewide target for annual emissions reductions for NOx or VOC as a significant contributor to			
	PM10.			
E6	If the State includes any areas designated as nonattainment or maintenance for PM10,			
	are NOx and/or VOC a significant contributor to PM10 emissions anywhere in the			
	State?			
E7	Does the State include any areas designated as nonattainment or maintenance for CO?	Yes		
E8	Does the State include any areas designated as nonattainment or maintenance for	No		
	ozone?			
	Statewide Total Emission Reductions PM2	.5 Target #1		
E12	The baseline cumulative emissions reductions (total daily kilograms) of PM2.5. This			
	value is from the 2018 Baseline Performance Period Report and is the cumulative			
	estimated emissions reductions (total daily kilograms) as reported to the CMAQ Public			
	Access System for the 4 Federal Fiscal Years before the start of the Federal Fiscal Year			
	2018-2021 performance period. [23 CFR 490.107(b)(1)(ii)(B)]			

E13	The 2-year cumulative emissions reductions (total daily kilograms) of PM2.5. This value	
	is the actual 2-year performance derived from the latest data collected through the	
	midpoint of the Federal Fiscal Year 2018-2021 performance period and is the same	
	value provided for the 2020 Mid Performance Period Progress Report. [23 CFR 490.107(b)(2)(ii)(A)]	
	490.107(b)(2)(l)(A)]	
	To calculate the measure, data for Federal Fiscal Years 2018-2019 was extracted from	
	the CMAQ Public Access System on or after July 1 of 2020. [23 CFR 490.105(e)(4)(i)(B),

The State of New Hampshire **Department of Environmental Services**

Robert R. Scott, Commissioner

April 25, 2024

Mr. William Watson NH Department of Transportation Bureau of Planning & Community Assistance 7 Hazen Drive, P.O. Box 483 Concord, NH 03302-0483

Re: Statewide Transportation Improvement Program 2023 – 2026 Amendment #5

Dear Mr. Watson,

The New Hampshire Department of Environmental Services (NHDES) appreciates the opportunity to provide comments on the New Hampshire (NH) Statewide Transportation Improvement Program (STIP) 2023 – 2026 Amendment #5, which includes projects in the Boston-Manchester-Portsmouth (SE) NH Ozone "Orphan Area."

Due to a decision of the U.S. Court of Appeals for the District of Columbia Circuit (South Coast Air Quality Management District v. EPA), as of February 16, 2019, the Boston-Manchester-Portsmouth (SE) NH "Orphan Area" is required to demonstrate conformity for the 1997 ozone NAAQS for any plans approved after February 16, 2019. Per this court decision, a regional emissions analysis is not required, and conformity is demonstrated through 1) use of the latest planning assumptions; 2) consultation requirements; 3) timely implementation of any approved State Implementation Plan (SIP) Transportation Control Measures and 4) fiscal constraint. These requirements have been discussed though the interagency consultation process and are currently being met.

On March 10, 2014, EPA approved carbon monoxide (CO) maintenance plans, known as "limited maintenance plans," for the City of Manchester and City of Nashua. These limited maintenance plans were established with a 2021 horizon year. The second ten-year CO maintenance period for these plans terminated on January 29, 2021. Hence, these areas are no longer required to demonstrate transportation conformity for their respective CO maintenance areas.

Therefore, NHDES is in concurrence with the determination that the NH STIP 2023 – 2026 – Amendment #5 conforms to the SIP as required by Title 40, Code of Federal Regulations, Part 93, and will not adversely affect continued attainment of the ozone standard in the State of New

Hampshire nor will it adversely impact continued attainment of the carbon monoxide standard in the City of Manchester or the City of Nashua.

If you have any questions, please contact me at Jessica. Wilcox@des.nh.gov or (603) 271-5552.

Sincerely,

Jessica Wilcox

Jessica Wilcox Supervisor, Mobile Sources Section NH Department of Environmental Services 29 Hazen Drive Concord, NH 03302
