The unemployment rate and labor force data for New Hampshire (statewide) are usually released on a Tuesday, typically the second or third Tuesday in a month, at 11:00 a.m. Local area unemployment rates and labor force numbers are released approximately nine days later, on the second Thursday following the statewide data release, at 8:30 a.m. [Please note that the New Hampshire statewide unemployment rate for a given month is typically available and released about eleven days after the U.S. unemployment rate is announced for that month.]

Due to annual state benchmarking activity, and coordination with the US Bureau of Labor Statistics and other New England states, the statewide unemployment rate and labor force data for January 2023 will be released on Tuesday, February 28, 2023. Other exceptions to the typical release dates are noted above to account for federal holidays.
